

Enterprise XIR2: Administering Users and Content

This two-day instructor-led course explains how to perform the tasks in the central management console (CMC). These tasks involve supporting BusinessObjects® Enterprise users and groups so they can access corporate data through the web portal in BusinessObjects® Enterprise. This corporate data can take the form of Crystal Reports®, BusinessObjects® Web Intelligence®, or Desktop Intelligence® documents, OLAP Intelligence reports, program objects, object packages, and popular third-party objects, such as Microsoft Word and Excel files, among others.

Please note: this course does not discuss maintaining BusinessObjects Enterprise servers, which is taught in the BusinessObjects Enterprise XI R2: Administering Servers – Windows course.

The business benefit of this course is that it provides a foundation for system architects/administrators to effectively manage both users and content on the BusinessObjects Enterprise platform.

On completion, delegates will be able to:

Effectively manage users and groups using the Central Management Console.

Who should attend?

The target audience for this course is system architects/administrators who are new to BusinessObjects Enterprise and will be responsible for maintaining BusinessObjects Enterprise users, groups, and objects in their organisation.

Prerequisites

While not required for this course, experience with these products or technologies will be helpful:

- Windows conventions

- Familiarity with Windows NT/2000 and NT administration
- NT enterprise security concepts (global/local groups, and directory structure)

Practical work

Practical sessions will reinforce many of the topics covered and are used extensively throughout this course. These allow delegates to have direct hands-on practice with a BusinessObjects implementation.

Course Duration

2 days

Related and Follow-On Courses

BusinessObjects XI R2: Administering Servers

Acuma Education

All Acuma courses are delivered by trainers who are highly experienced consultant practitioners. This rich project experience coupled with professional training skills helps delegates to focus on how the course contents can be put into practice in their workplace.

Acuma delivers courses from dedicated training facilities in Manchester, Birmingham and London, but also deliver training offsite using suites of laptops, with the option to customise courses to use your own business data and tailored to your exact training needs. The most appropriate training format depends upon your training objectives, number of learners, timescales, budgets and delivery logistics. Whatever your needs, Acuma will find the approach most suited to them.

Acuma Education's seal of quality is demonstrated through consistent achievement of the prestigious "Gold Standard" from the IITT (Institute of IT Trainers).
