

Building & Implementing Business Views

This course introduces delegates to Business Views. Through hands-on activities and instructor demonstration, delegates will be able to define Business Views and the components that make up a Business View, and modify and create a Business View based on business needs.

The Crystal Enterprise 10: Building and Implementing Business Views course is a core course in the Crystal Enterprise Certified Professional (CECP) certification and a core course in the Crystal Reports Certified Professional (CRCP) certification.

On completion, delegates will be able to:

- Define the Business Views architecture
- Manage Business Views and Business Elements
- Manage Data Foundations and Data Connections
- Create a Business View

Who should attend?

The target audience for this course is Crystal Enterprise Administrators, Database Administrators, and/or Business Analysts who are responsible for creating and maintaining Business Views.

Prerequisites

To be successful, delegates who attend the CE 10 Building and Implementing Business Views course must have a working knowledge of:

- Crystal Enterprise security concepts
- Crystal Enterprise Web Desktop
- Crystal Reports and core report design concepts
- NT enterprise security concepts (global & local groups, and directory structure)

Course Duration

2 days

Practical work

Practical sessions will reinforce many of the topics covered and are used extensively throughout this course. These allow delegates to have direct hands-on practice using Crystal Enterprise® to build views to satisfy common business needs.
